## Cleary Bros (Bombo) Pty Ltd

Albion Park Quarry Extraction Area Stage 7 Extension

**Table C.1  
Community Engagement Undertaken for the Project**

<b>Consultation Tool</b>	<b>Stakeholder Group</b>	<b>Description</b>
Community Consultative Committee	Nearest neighbours' Local residents / properties Council	Cleary Bros has established and runs a Community Consultative Committee (CCC) for the Quarry which meets biannually. The forum has been used throughout both the planning process and EIS phase to share information about the Project, seek feedback and answer questions. Dates of meetings at which the Project was discussed include 25 July 2019, 5 December 2019, 23 July 2020, 3 December 2020, 22 July 2021 and 2 December 2021.
Interview	Nearest neighbours	Semi-structured interviews with the stakeholders identified as 'nearest neighbour' were held in person or via phone between late November 2020 and the end of January 2021, utilising a semi-structured interview guide/questionnaire. Stakeholders were contacted proactively via contact numbers.
Online Survey and survey tool	All stakeholders	An online survey to ascertain feedback from the wider community was conducted from 11 December 2020 to 10 February 2021. This was shared with direct neighbours, as well as through local community groups (Albion Park Chamber of Commerce), Council and on Cleary Bros website and Social Media platforms.
Personal Meetings	Nearest neighbours	Meetings with stakeholders at their residence (or common meeting area), to provide personalised opportunities for engagement and provision of information regarding the Project. These were attended by Cleary Bros and RWC staff during July 2019.  Additional meetings were held with the owners of "Figtree Hill" throughout 2020 to 2022, resulting in a negotiated agreement that addresses a range of matters, including air quality, noise and visual impacts.
Project Factsheet (FAQs)	All stakeholders	One Project Fact Sheet was prepared to introduce the Project during the early phase of assessment and to provide a summary of the plans for the design of the Project (December 2020). This sheet was shared with direct neighbours, as well as through local community groups (Albion Park Chamber of Commerce), Council and on Cleary Bros website and Social Media platforms.
Government Briefings	Government Stakeholders	Correspondence to and/or meetings with relevant local, State and Commonwealth government agencies to provide an overview of the Project and Project parameters, to discuss the assessment process and other relevant matters that need to be addressed in the EIS. Specific to the SIA, a meeting was held with DPIE on 24 November 2020. Teleconferences were also held with the Biodiversity Conservation Division of DPIE and the Commonwealth Department of Agriculture, Water and Environment to discuss a range of biodiversity issues relating to the Project.
<b>Information tools</b>		
Cleary Bros Website / Social Media	All stakeholders	Cleary Bros social media platforms were used to increase participation and reach in the EIS and SIA engagement.
Email and Phone Correspondence	All stakeholders	Various phone calls and emails relating to the Social Impact Assessment (SIA) process to stakeholders, as required, to organise meetings, provide information and/or respond to questions relating to the SIA process.

**Table C.2**  
**Coverage of Issues Raised during Community Engagement**

<b>Issue</b>	<b>Addressed in Section</b>
<b>Environmental Issues</b>	
Noise, vibration and flyrock from quarry blasting	6.3.6.2
Noise from machinery in the extraction area	6.3.6.1
Dust fallout affecting water quality in neighbour's rainwater tanks	6.2.7 & 6.3.6.2
Availability of water for quarry dust suppression	6.9.3.2 & 6.9.3.3
Reduction in flows in local springs	6.9.5 & 6.10.5.2,
Destruction of native flora and fauna	6.5.5 & 6.5.6
<b>Economic Issues</b>	
Adverse impacts on property prices and saleability	SCSC Part 10 – Section 7.3.2
Adjoining landowners bearing the cost for the wider community	6.13.5 & SCSC Part 10 – Section 7.3.1
Business opportunities on surrounding properties would be adversely impacted	SCSC Part 10 – Sections 7.3.4 & 7.6
<b>Social Issues</b>	
Lack of trust in systems used to influence project design and operational management	6.14.4 & SCSC Part 10 – Section 7.3.7
Anxiety created by destruction of heritage items and landscapes	SCSC Part 10 – Section 6.2.8
Health impacts of blast fume and crystalline silica dust	3.3.3, 6.3.6.2 & SCSC Part 10 – Section 7.3.1
Visibility of extraction operations and rock faces	6.4.5 & SCSC Part 3
